Business Insights & Recommendations

Key Findings

- Month-to-month contracts exhibit the highest churn.
- Fiber optic customers contribute the most churn cases.
- Electronic check users have the highest churn levels.
- Churn decreases significantly as customer tenure increases.
- Customers without Tech Support churn more frequently.
- Customers without Online Security churn more frequently.

Business Recommendations

- Incentivize customers to move to annual contracts.
- Improve customer experience for Fiber Optic users.
- Target high-risk customers with retention campaigns.
- Promote Tech Support and Online Security packages.
